

You can help our sea turtles have a successful nesting and hatching season by being Sea Turtle Friendly.

After your day at the beach, smooth out your sandcastles and fill in holes you have created.

Turn off any lights that can be seen from the beach. Close blinds and curtains for inside lights.

Use only flashlights with red film over them that are turtle friendly.

Sea turtles may eat plastic, mistaking it for one of their favorite foods such as jellyfish. Ingested plastic can kill sea turtles. Please throw away any plastic you find when visiting the beach.

Remove any beach chairs, tents, toys, umbrellas, kayaks, floats or obstacles from sunset to sunrise.

If you ever see a sea turtle or hatchling, stay away and **DO NOT DISTURB**.
